### **DETAILED ACTION**

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 34 is rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 6069377 to Prentice et al (hereinafter Prentice).

Prentice discloses a sensor for determining the local contrast of an observed scene by detecting the luminance emanating from that scene using an array comprising at least one row of pixels disposed in at least one dimension of the array, the sensor comprising in each pixel a photosensitive circuit supplying a signal representing the local luminance emanating from the image and captured by said pixel in the form of an integration value, and a comparator for comparing the signal representing the local luminance to a reference value and supplying a command signal when said luminance signal is equal to the reference value (col. 4, lines 7-19; col. 5, line 18-31).

### ***Allowable Subject Matter***

Claims 23-33 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is an examiner's statement of reasons for allowance: The prior art fails to disclose, either singly or in combination, a method consisting sampling the

integrated values of the signals representing the luminances captured by the pixels adjacent a pixel concerned at a time in said cycle at which the integrated value of the luminance captured by the pixel concerned becomes equal to predetermined reference value, and determining the local contrast of the pixel concerned on the basis of the values sampled in this way.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
